Inconsistency Flags

1. [HIGH] billing anomalies

Dates: 2023-03-21 / 2023-04-04 | Pages: 3, 4

Procedure billed at \$3050.00 by orthopedic specialist appears excessive for standard follow-up care, particularly when consultation was only \$425.00

Recommendation: Verify procedure codes and medical necessity for high-cost procedure

2. [MEDIUM] billing anomalies

Dates: 2023-04-07 / 2023-04-18 | Pages: 6, 8

Physical therapy billing shows inconsistent amounts for similar follow-up visits ranging from \$175.00 to \$525.00

Recommendation: Review billing codes and session types to justify variable pricing

3. [MEDIUM] provider statement conflicts

Dates: 2023-03-14 / 2023-04-10 | Pages: 1, 7

Condition described as 'chronic active' on 2023-04-10 conflicts with acute onset from MVA in March 2023

Recommendation: Clarify timeline and relationship between acute injury and chronic condition

4. [LOW] billing anomalies

Dates: 2023-04-10 / - | Pages: 7

Unknown provider entry with \$0.00 billing may indicate incomplete documentation or potential unbilled services

Recommendation: Identify provider and verify if services were actually rendered
